

Action policy of Student Youth Organization of Azerbaijan Technological University

The Student Youth Organization of Azerbaijan Technological University, established in 2010, is one of the main institutions of the university embracing about 4,000 students. The Student Youth Organization (SYO) plays an important role in the cultural, intellectual and social activities of student youth at the university, and implements many events and projects aimed at integrating young people into society, developing their leadership abilities, forming a sense of social responsibility, and protecting the rights of young people. The activities of these organizations are not only limited to the students revealing their potential, but also influence the general youth policy of the country. SYO bases its action policy on the following items:

1. Youth Participation in Social Life: SYOs ensure that students are actively involved throughout university life. They organize various social and cultural events, seminars, conferences, sports competitions and volunteer activities. These events help students to develop their teamwork skills and to be sensitive to social issues. Through SYO, students have the opportunity to contribute to society by actively participating in social processes outside the university walls.

2. Leadership and Development Perspectives: The SYOs are an ideal platform to develop the leadership potential of the youth. Students in leadership positions in the organization have the opportunity to develop important qualities such as team management, initiative, decision-making and responsibility. These skills will play an important role in their future careers and make them future leaders of the country.

3. The Role in Ensuring Youth Policy: The youth policy of the Republic of Azerbaijan is aimed at protecting the rights and interests of young people, increasing their participation in socio-economic and cultural life. The Student Youth Organization of Azerbaijan Technological University plays an important intermediary role in the implementation of this policy with its contingent. SYO conveys the problems of student youth to state institutions and the public, and puts forward various initiatives for the protection and development of the interests of young people. At the same time, SYO encourages young people to collaborate at the national and international level, which broadens their outlook and experiences.

4. Education and Career Development: SYO also supports the academic success of young people. Through the organization, students improve their knowledge and skills by participating in various trainings, seminars and internship programs, as well as make useful contacts for their future careers. As

a part of youth policy, SYO is an important platform for implementing changes and reforms in the education system according to the needs of students.

5. Protection of Youth Rights: SYO is an important institution that defends the rights of students along with STUC. This organization fights for the protection of students' educational rights, transparency and justice principles in the university. In case of any injustice or discrimination among the students, SYO helps to solve these problems and acts as the voice of the students.

Consequently, The Student Youth Organization of ATU is one of the important structures in the youth policy that both defends the interests of students and carries out activities aimed at their social and intellectual development. Through SYO, young people become more active, responsible and enterprising individuals not only in higher education institutions, but in society in general. For this reason, SYO activity, as an integral part of youth policy, makes an important contribution to the future development of the country.
